

General Feed and Grain, Inc.

April 2009

I decided to give the **Enviro Save** product a try, based on the advice of a friend. I thought that my snowmobile would be the perfect guinea pig to see if there's anything to the product, it's a 2006 800cc Ski-Doo. It took the machine about an hour to respond and then I was shocked at the difference in power. It was so noticeable, that the guys I was riding with asked me about getting the product. They have also noticed the difference using Enviro Save. Since that time, I have bought and used other **Enviro Save** products, with similar results.
