ENVIRO-SAVE PRODUCTS INC.
P.O. Box 80129
Burnaby, BC
V5H 3X5

ATTENTION: Warren Casperon
Subject: Enviro-Save for Firearms

Dear Warren:

We have done extensive testing with your product. Those involved were; Tom Fleming, Pacific Shooter Association-Range Master; Mark Chiu, P.S.A. Statistician and Tom Fudger.

All firearms were cleaned, the barrel temperature was recorded and 10 rounds were fired through a chronograph. The average velocities were recorded along with the temperature rise.

The firearms were then treated with Enviro following the instructions on the bottle.

All firearms were then shot and results recorded, enclosed is a copy of results showing before and after treatment.

From the results of the tests, it is evident that there is a increase in velocity and a reduction in barrel temperature. We also found a slight improvement in accuracy and all guns were easier to clean.

I do a lot of handloading with a variety of loading presses. For me your products have been a bonus. I clean and lubricate all my loaders with Enviro Products. They all run smoother, more reliable and show no wear on the moving parts. Really what more could a guy ask for.

Warren you have developed and excellent treatment for firearms and when the over skeptical start to use it, it will become widely used.

If I can be of any help or anyone would like to talk about your products please give them my phone number 929-2543.

Yours Truly,

A handwritten signature in cursive script that reads "Tom Fudger".
