To warren caperson

Enviro save maple ridge bc Canada

604 522 8836

From a long time trusting customer. I have known warren since 1990. I have been using Enviro Save in every Piece of equipment i own including my 8 classic and muscle cars, lawn tractors ect. I have never had worn out piece or breakage in all thoughs years.

My wife and my daily drivers stands the test of time eg. My 92 tj jeep reached 650 k when sold 12 years ago..still strong now has about 800 k . My 77 ply volare had 560k when sold with no drive train issues or oil burning. My current 03 rubicon when bought 65k now 355k after treatment fuel milage added 50 km to a tank. One day 2 years ago i did a full drive train fluid change. Filled everything i thought . 3 months and 4 k going bach and forth to work noticed a wine in the rear diff. Pulled the rear diff cover to find no diff oil. Was only a light film of gray with no blue or vissible wear. the teatment saved my diff. 2 quick oil changes , re treated the diff and after 25k it is running fine with only a slight wine . That is more than an amazing product. the treatment clearly shows the performance of this product. We also own a 30 year untreated old see doo . Mechanic told us the rotary valve 2 stoke engine was done , wore out. tried the 2 stoke product to save it. After two seasons of use it is running stronger and smoother than it ever was.

I would encourage everyone who wants to protect there investment especialy for long term storage like mine , a one time treament . Small cost for such a long term gain

Sincerly submitted
