Envirosave Metal Treatment Corp
PO Box 21000
Maple Ridge SQ RPO
Maple Ridge, BC, V2X 1P7

Subject: Recommendation,

I have been using this product since I was first introduced to it when a representative made a presentation in our office of the trucking firm I was employed with in 2003.

I started using Enviro-Save in my car and managed to get 500,000 + kilometers out of a straight 6 automatic before the car finally had to be put to rest. Since then, I have been out of the country and when I returned, I did not immediately treat my new vehicle with Enviro-Save until I started having trouble with lower mileage, oil consumption, fouled spark plugs and was about to be confronted with costly repairs. Looking for an answer to keep the vehicle out of the repair shop I remembered Warren at Enviro-Save and called him.

I immediately did a full vehicle treatment which included engine, transmission, power steering, and fuel system with excellent results. The engine no longer has a noisy valve train and there is no longer oil consumption between changes. Fuel consumption is down and the transmission shifts are more positive. The throttle is noticeable more responsive along with a 200 RPM drop at highway speeds.

Enviro-Save saved me from costly repairs. I would highly recommend Enviro-Save to anyone looking to improve engine efficiency and longevity as well as a significant reduction of friction.

Thank you, Warren, for this excellent product. Very well done.

Gratefully yours,

Zale Gabriel
