RE: Enviro Save Sales – Transit Industry - SEPTA

Dear Warren,

The purpose of this letter is to provide some history and detail about our transit industry customers, specifically with the Southeastern Pennsylvania Transportation Authority (SEPTA) in Philadelphia, PA.

We demonstrated the Enviro Save product line to SEPTA in March of 2002. They were so impressed with the gear treatment testing we did on the Market Frankfort Subway trains they decided to stock the Enviro Save products.

SEPTA has their own metallurgical laboratory where they do all oil analysis on gear boxes, engines, compressors, transmission etc. The issue was a gear box on one train was flagged for removal from service due to high metal content in the oil over several months of monitoring. SEPTA decided to treat the gear box with Enviro Save and give it 90-days testing. After 90-days, the gear box never came back to be removed again. The same gear box was still found in service without cause for another 3-years, when the entire train was due for an overhaul.

Similar, in the Light Rail Division, overhead catenary system pantographs were showing premature wear and failure. After using Enviro Save HD Grease, they reported no further issues with wear and failure.

SEPTA stocks the following Enviro Save products and has been our customer since 2002.

- Gear Treatment 500mL 61-01114
- Grease HD tubes - 61-00662 BB1
- Grease HT Tubes 61-654
- Grease 5-gal pail - 61-00662-BB2
- Air Tool Treatment - 61-00842 - BB1
- Air Tool Treatment 61-00842- BB2
- 4-Stroke Engine - Gas - 61-00854a
- 2-Stroke Engine - Gas 67-390-A
- Compressor Mineral - 67-393-A
- Compressor Synthetic 67-394-A
